SUMMARY

As an experienced AWS Cloud Infrastructure Associate, I have a proven history of implementing, managing, and optimizing cloud solutions. I thrive in collaborative environments, where I can contribute to innovation and drive efficiency in cloud infrastructure management. With expertise across both AWS and Azure platforms, I'm passionate about solving complex technical challenges.

EXPERIENCE

Cloud Infrastructure Associate

UST:

Feb 2021 – Present

Trivandrum, India

- Provisioned and managed AWS Workspaces for end users while integrating Azure AD SSO for seamless and secure access.
- Integrated Azure AD SSO with AWS, streamlining secure access and reducing login-related support tickets by 30%.
- Implemented least-privilege access controls and streamlined onboarding and provisioning processes, reducing setup time by 25% and lowering access-related support tickets by 30%, while strengthening overall security compliance.

Technical Support

Indesphere Consulting:

Dec 2018 -July 2020

Bengaluru, India

- Responding to customer inquiries and providing technical support via various channels such as phone, email, chat, or ticketing systems for Walmart, Overstock, Group on and Open Sky.

Technical Support

SYT Marketing FZ LLC:

May 2017 – May 2018

Dubai, UAE

- Handling admin panel of the mobile application called "SukuMuku".
- Monitoring the performance and usage of mobile applications to identify any issues or bottlenecks. Also interacting with users/merchants and vendors to prepare check list with the development team.

Technical Support

Sutherland Global Services INC:

Apr 2015- Jan 2017

Kochi, India

- Diagnose and troubleshoot technical issues that users encounter with McAfee antivirus software. This could involve investigating software conflicts, resolving installation errors, or addressing performance issues.
- Document support interactions, including details of reported issues, troubleshooting steps taken, and resolutions provided.

Junior iOS Developer

Glazer Software Solutions:

Nov 2013 -Jan 2015

Chennai, India

- Contributing to the development of iOS applications by writing code, implementing user interfaces, integrating backend services, and adding new features.
- This could involve tasks such as UI design, implementing business logic, managing data storage, and integrating APIs.
