SUMMARY

Cloud Infrastructure and DevOps Engineer with 11 years of IT experience, including 5+ years focused on AWS cloud infrastructure, identity and access management, automation, and cloud operations. Experienced in Terraform, AWS CloudFormation, GitHub Actions, OIDC federation, Docker, Kubernetes, and monitoring tools. Skilled in infrastructure as code, CI/CD automation, multi-account AWS environments, and cloud security. Hands-on experience developing self-service cloud automation solutions and troubleshooting cloud infrastructure and containerized workloads.

CORE COMPETENCIES

AWS Cloud Infrastructure | Infrastructure as Code | CI/CD Automation | Cloud Identity & Security | Containerization & Orchestration | Cloud Networking | Monitoring & Observability | Infrastructure Troubleshooting

TECHNICAL SKILLS

AWS Cloud: EC2, S3, Lambda, API Gateway, CloudFront, DynamoDB, Cognito, IAM, IAM Identity Center, AWS Organizations, CloudWatch, Route 53

DevOps & CI/CD: Git, GitHub Actions, OIDC-based AWS authentication, Bash, Linux CLI
Infrastructure as Code: Terraform, AWS CloudFormation
Containers & Orchestration: Docker, Kubernetes (Kind), Helm, Service Discovery, Health Probes, Workload Troubleshooting

Networking: VPC, Internet Gateway, NAT Gateway, Security Groups, NACLs, DNS, Load Balancers
Identity & Security: SSO, SAML, OAuth 2.0, JWT, OIDC Federation, ABAC, Least-Privilege Access

Monitoring & Observability: Prometheus, Grafana, Workload Metrics, Container Resource Monitoring, Failure Diagnosis & Recovery Validation

PROFESSIONAL EXPERIENCE

UST — Cloud Infrastructure Associate |*Trivandrum, India | February 2021 – August 2026*

Cloud Infrastructure & DevOps | Aptia Group | *October 2025 – August 2026*

- Managed Amazon AppStream 2.0 environments for internal users, troubleshooting application access and performance issues to maintain service reliability.
- Worked with GitHub Actions CI/CD workflows to support deployment automation and consistent release processes.
- Contributed to infrastructure automation and containerization initiatives to improve deployment consistency and operational efficiency.
- Troubleshot cloud infrastructure issues and collaborated with relevant teams to resolve incidents and improve platform reliability.

Cloud Automation & Infrastructure | Wolters Kluwer | *February 2021 – September 2025*

- Automated AWS infrastructure provisioning and management using Terraform and AWS CloudFormation to improve deployment consistency and reduce manual effort.
- Developed self-service cloud operations capabilities using AWS Lambda, API Gateway, and Amazon Cognito to streamline cloud management workflows.
- Integrated Azure AD SSO with AWS IAM Identity Center to streamline enterprise authentication and identity management.
- Applied IAM governance and least-privilege access controls across AWS multi-account environments using AWS Organizations and IAM.
- Managed Amazon WorkSpaces environments and coordinated with AWS infrastructure teams to provision user access in accordance with business requirements and least-privilege principles.
- Contributed to automation initiatives associated with a 30% reduction in identity-related support incidents and a 25% reduction in manual administrative effort.

PERSONAL PROJECTS

RaaS 2.0 — Reboot as a Service — Asynchronous Cloud Operations Platform
Technologies: AWS, Docker, Kubernetes (Kind), Helm, Redis, BullMQ, Prometheus, Grafana, Terraform, S3, CloudFront, Cognito

- Re-architected a serverless cloud operations project into an asynchronous architecture comprising an API service, Redis/BullMQ job queue, and dedicated worker.
- Containerized application components using Docker and tested workload deployments in a local Kubernetes cluster using Kind.
- Configured Kubernetes liveness and readiness probes and troubleshot worker outages, Redis availability, Service selector mismatches, and CrashLoopBackOff incidents.
- Deployed Prometheus and Grafana using Helm to monitor workload availability, resource utilization, and container restarts.
- Diagnosed a Grafana OOMKilled incident, increased its memory limit from 256 MiB to 512 MiB, and verified recovery.
- Integrated Cognito authentication with an S3-hosted frontend delivered through CloudFront. API token validation and team-based authorization remain in development; EC2 reboot operations are simulated.

  Live Demo: https://d1sppsdlhlbczw.cloudfront.net/
  GitHub: https://github.com/RaseefAzeez/raas-v2

RaaS 1.0 — Reboot as a Service — Serverless Cloud Operations
Technologies: AWS Lambda, API Gateway, Cognito, S3, CloudFront, Terraform, GitHub Actions

- Built a serverless cloud operations application using AWS managed services and infrastructure as code.
- Implemented Cognito-based authentication and developed authorization logic around JWTs and tag-based Attribute-Based Access Control (ABAC) for EC2 operations.
- Automated infrastructure provisioning using Terraform and GitHub Actions, integrating OIDC federation to eliminate the need for long-lived AWS access keys.

  GitHub: https://github.com/RaseefAzeez/RaaS

Personal Web Platform & Serverless CI/CD
Technologies: Amazon S3, CloudFront, API Gateway, Lambda, DynamoDB, CloudFormation, GitHub Actions

- Built a serverless web platform using AWS services, with CloudFormation-managed infrastructure and automated deployment workflows.
- Configured OIDC-based authentication between GitHub Actions and AWS to support secure, automated deployments.
- Integrated CloudFront for content delivery and improved access to the hosted web application.

EARLIER CAREER

- **Indesphere Consulting** — *Technical Support Engineer | Bangalore, IN | Dec 2018 – Jul 2020*
- **SYT Marketing FZ LLC** — *Technical Support Specialist | Dubai, UAE | May 2017 – May* 2018
- **Sutherland Global Services** — *Tier-2 Support Engineer | Kochi, IN | Apr 2015 – Jan 2017*
- **Glazer Software Solutions** — *Junior iOS Developer | Chennai, IN | Nov 2013 – Jan 2015*

Earlier experience across enterprise IT operations, technical troubleshooting, production environments, and software development.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03) - Issued May 2024 | Valid through May 2027

EDUCATION

Master of Computer Applications (MCA) | 2012
Hindustan College of Engineering and Technology, Coimbatore, Tamil Nadu, IN

Bachelor of Computer Applications (BCA) | 2009
Sree Narayana Guru College, Coimbatore, Tamil Nadu, IN

LANGUAGES — English | Malayalam | Tamil
