

RASEEF AZEEZ

Cloud Infrastructure Engineer | DevOps Engineer | AWS Certified Solutions Architect – Associate

Location: Trivandrum, Kerala, India | Phone: +91-638-38-90464 | Email: raseefazeez@gmail.com

LinkedIn: [linkedin.com/in/raseef-azeez](https://www.linkedin.com/in/raseef-azeez) | GitHub: github.com/RaseefAzeez | Portfolio: d3svccsjj104ji.cloudfront.net

PROFESSIONAL SUMMARY

AWS Certified Solutions Architect – Associate with 10+ years of IT experience, including 5+ years specializing in AWS cloud infrastructure, platform operations, automation, governance, and security.

Experienced in designing and automating cloud-native solutions using AWS, Terraform, CloudFormation, Docker, Kubernetes, Redis, and serverless technologies. Strong expertise in identity management, Infrastructure as Code, cloud governance, and self-service platform engineering.

Proven ability to improve operational efficiency, implement secure access controls, automate infrastructure operations, and build scalable cloud platforms that enhance reliability and governance.

CORE COMPETENCIES

- AWS Cloud Infrastructure
- Infrastructure as Code (Terraform, CloudFormation)
- DevOps & CI/CD Automation
- Kubernetes & Containerization
- Identity & Access Management
- Cloud Governance & Security
- Platform Engineering
- Serverless Architectures
- Cloud Operations & Monitoring

TECHNICAL SKILLS

Cloud Platforms:

AWS (Organizations, IAM, IAM Identity Center, Cognito, EC2, Lambda, API Gateway, DynamoDB, S3, CloudFront, CloudWatch, VPC)
Azure Active Directory (Azure AD), SSO Integration

Infrastructure as Code:

Terraform, AWS CloudFormation

Containers & Platform Engineering:

Docker, Kubernetes, Redis, BullMQ

CI/CD & Automation:

GitHub Actions, CI/CD Pipelines, Bash, PowerShell

Monitoring:

Amazon CloudWatch, Prometheus, Grafana

Version Control & Networking:

Git, GitHub, TCP/IP, DNS, DHCP, Subnetting, OSI Model

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03)

Issued: May 2024

Valid Until: May 2027

PROFESSIONAL EXPERIENCE

UST | Cloud Infrastructure Engineer

Trivandrum, India | February 2021 – Present

Environments:

AWS Organizations, IAM, IAM Identity Center, Azure AD SSO, Lambda, API Gateway, Terraform, CloudFormation, Docker, Kubernetes, GitHub Actions, CloudWatch

Career Advancement:

Progressed through three internal role transitions from Cloud Support to IAM, Cloud Infrastructure, and DevOps teams supporting enterprise clients including Wolters Kluwer and Aptia Group.

Cloud Automation (Wolters Kluwer | Feb 2021 – Sep 2025):

Designed self-service cloud operations platforms utilizing AWS Lambda, API Gateway, Cognito, Terraform, and CloudFormation, achieving full Infrastructure-as-Code coverage.

Identity & Governance:

Engineered enterprise identity integrations using Azure AD SSO and IAM Identity Center, reducing identity-related support incidents by 30%.

DevOps & Cloud Operations (Aptia Group | Oct 2025 – Present):

Support cloud administration, operational automation, CI/CD activities, and platform operations within enterprise cloud environments.

Operational Excellence:

Automated legacy administrative workflows and infrastructure provisioning processes, reducing manual operational effort by 25%.

PROJECTS

RaaS 2.0 – Cloud Operations Platform - (Personal Project)

Technologies:

Docker, Kubernetes, Redis, BullMQ

• Re-architected an operations platform into a Kubernetes-based microservices architecture.

• Implemented asynchronous job processing using Redis and BullMQ.

• Designed API and worker services to improve scalability and fault isolation.

• Configured Kubernetes Deployments, Services, ConfigMaps, and Secrets.

• Implemented containerized workloads to support reliable infrastructure operations.

• Improved maintainability and operational flexibility through service separation.

RaaS 1.0 – Reboot as a Service (Personal Project)

Technologies:

AWS Lambda, API Gateway, Cognito, DynamoDB, CloudFront, Terraform

- Developed a secure self-service EC2 operations platform.
- Implemented OAuth2 authentication and JWT-based authorization.
- Applied Attribute-Based Access Control (ABAC) using Cognito groups and AWS resource tags.
- Automated infrastructure provisioning using Terraform.
- Enforced secure operational workflows aligned with enterprise governance standards.

PREVIOUS EXPERIENCE

Indesphere Consulting, Bangalore, India | Technical Support Engineer | December 2018 – July 2020

SYT Marketing FZ LLC, Dubai, UAE | Technical Support Specialist |May 2017 – May 2018

Sutherland Global Services, Kochi, India| Tier-2 Support Engineer | April 2015 – January 2017

Glazer Software Solutions, Chennai, India |Junior iOS Developer | November 2013 – January 2015

Built strong foundations in production support, troubleshooting, application support, customer-facing operations, and software development.

Serverless Portfolio Platform (Website) - (Personal Project)

Technologies:

Amazon S3, CloudFront, API Gateway, Lambda, DynamoDB, CloudFormation, GitHub Actions

- Developed an event-driven serverless web platform following AWS Well-Architected principles.
- Automated multi-environment deployments using GitHub Actions.
- Implemented secure API integrations and global content delivery using CloudFront.
- Applied Infrastructure as Code practices using CloudFormation.

EDUCATION

Master of Computer Applications (MCA)
Hindustan College of Engineering and Technology

Bachelor of Computer Applications (BCA)
Sree Narayana Guru College

ADDITIONAL INFORMATION

Languages:

English, Malayalam, Tamil
